

SYED MUHAMMAD ALI NAQVI

Full-Stack Software Engineer | Healthcare & EdTech | AI-Assisted Products

Punjab, Pakistan · shahyed99@gmail.com · linkedin.com/in/ali-naqvi-1a9576331 · github.com/AliShah1029384756

Portfolio: alishah1029384756.github.io/AliShah1029384756 · Projects Hub & Case Studies available on site

PROFESSIONAL SUMMARY

BSCS graduate from FAST-NUCES (2022–2026) focused on full-stack web engineering for healthcare and education workflows. Builds end-to-end applications with React, Node.js, Express, MongoDB, JWT authentication, and carefully integrated AI features. Flagship work includes a team Final Year Project (AutoSmart — AI-assisted autism-support platform) and domain systems (ClinicOS, SchoolIEP, EduConnect). Complements engineering with 3+ years of concurrent CS teaching, mentoring, and hostel welfare roles. Currently Digital Marketing Intern at Atlas Honda Pakistan while actively pursuing software engineering roles.

TECHNICAL SKILLS

Primary Stack	JavaScript, React, Vite, Node.js, Express, MongoDB, Mongoose, REST APIs, JWT
Languages	JavaScript, Python, C/C++, Java, SQL, x86 Assembly (coursework)
Backend & Data	Authentication, RBAC, API design, MongoDB modeling, MySQL, Socket.IO
Frontend	React.js, HTML5, CSS3, Bootstrap, Chart.js, responsive UI patterns
AI / Tools	Groq API integration, Prompt Engineering, Git, GitHub, VS Code, Postman, Linux basics, Power BI fundamentals

FEATURED PROJECTS

AutoSmart — Team Final Year Project (S-Tier)

Role: Full-Stack Development & AI Integration · Stack: React, Vite, Node.js, Express, MongoDB, JWT, Nodemailer, Groq API

- AI-assisted autism-support platform: role-based auth, child profiles, structured assessments, progress tracking, AI-generated quiz content (Groq), rule-based therapy-game recommendations, and Emotion Explorer activities.
- Team FYP at FAST-NUCES (FYP-I graded A+, FYP-II A-). Academic prototype — not a clinical diagnostic tool. Full case study + architecture documentation on portfolio.

ClinicOS (A-Tier)

Stack: React, Vite, Node.js, Express, MongoDB, Mongoose, JWT, RBAC

- Therapy operations platform: session scheduling/status/attendance, treatment plans with goals, therapist profiles, and role-aware workflows (therapist, admin, caregiver, patient). Portfolio/academic project.

SchoolIEP (A-Tier)

Stack: React, Vite, Node.js, Express, MongoDB, Mongoose, JWT

- IEP management system: student records, parent coordination, IEP lifecycle, learning goals by category, and period-based progress reports. Portfolio/academic project.

EduConnect — Student Support & Community Platform

Stack: React / HTML-CSS-JS, Node.js, Express, MongoDB, REST APIs, JWT

- Full-stack platform combining discussion forums, academic counseling workflows, resource sharing, and admin dashboard. Schema and API layer designed from scratch with role-based access.

Additional Engineering Work: Multiplayer Chess (Node.js, React, Socket.IO — real-time game-state sync) · MERN E-Commerce workflow · Compiler Project (lexical analysis, parsing, semantic processing) · P2P Communication System · EduCore Open Learning Hub (400+ curated resources) · 17+ documented university course projects

EXPERIENCE & LEADERSHIP

Digital Marketing Intern — Atlas Honda Pakistan

July 2026 – Present · Lahore, Pakistan

Corporate digital marketing internship. Role listed transparently; primary career target remains software engineering and full-stack product work.

CS Teacher & Computer Lab In-Charge — Bethat Boys School & College, Chiniot

Aug 2022 – Present

- Teach Computer Science and programming to regular classes (25+ students) while providing academic support and managing the computer lab.

Hostel Warden / Teacher — Bethat Boys School & College · FAST-NUCES (concurrent)

Aug 2022 – Present · Chiniot-Faisalabad

- Manage daily operations and welfare for 40+ resident students across institutions; mentor junior CS students on coursework, projects, and career planning at FAST-NUCES.

CS Educator / Peer Mentor — FAST-NUCES & broader student community

2022 – Present

- 3+ years teaching and mentoring experience. Created structured learning hubs (EduCore 400+ resources, University Course Projects Hub, Web Dev Learning Hub) supporting independent student learning.

EDUCATION

Bachelor of Science in Computer Science (BSCS) — FAST-NUCES, Chiniot-Faisalabad Campus · 2022–2026 · Graduated

Relevant areas: web engineering, databases, networking, algorithms, systems programming, compiler construction

ACHIEVEMENTS

- Final Year Project – I graded **A+** (Fall 2025) · FYP-II graded **A-**
- Institutional recognition for teaching, lab management, and hostel warden responsibilities (Bethat Trust)
- Built and maintain multiple public student-learning resource hubs used by peers
